

I don't believe that telemarketers, charities, political support groups, or people doing surveys should be able to call a person's private residence at any time for any reason.

I pay for my phone line for my use, not for the convenience of these groups to promote their product or their cause. If they have to advertise or gather information, let them do it in a manner that does not effect me in my own home.

This practice results in my having to pay the State of Oregon a yearly fee to prevent only telemarketers from interrupting me. The political support groups, survey takers and charities are still free to call my home. I shouldn't have to pay a fee to ANYONE to prevent ANY of these people from calling. I think the FCC should be more concerned with the wishes of citizens, rather than catering to big business and political parties.

Thanks for listening,

Valerie Blackmore
